

Energy Efficiency.

Structural integrity for long lasting durability and peace of mind.

1. Vinyl frames and sashes will never chip, peel, crack or warp. Made tough and solid with PVC resin, their color is formulated throughout so the beautiful luster lasts.
2. A network of strategic insulating air chambers help reduce conduction and cut high energy bills.
3. Insulated glass unit featuring double strength glass with optimal air space improves year-round performance.
4. Interlock at sash meeting rails create a super-tight seal against air infiltration, adding to your sense of security, comfort and well being.
5. PPG Intercept™ Warm Edge Spacer System maximizes window performance and longevity.
6. Metal reinforcement adds strength at the meeting rail.
7. Exclusive triple lift rails provide strength and stability for easy operation.
8. Drop-in glazing adds extra protection from the elements.
9. Full-capture sill enhances protection from water and air infiltration.
10. Hidden screen track for clean lines and added beauty.
11. Quad 4 weatherstripping at header and sill add even more protection from the elements.

Plus these additional features:

- Fusion-welded sash and mainframe structure add strength and rigidity. Tough, extra-thick extrusion walls provide the ultimate in welding strength.
- Dual ventilator locks provide a safe, secure way to keep windows open for proper ventilation.
- Full balance covers help protect against air infiltration while adding a finished look to the window frame.
- Constant force balance system eliminates sash cords, weights and pulleys for smooth, comfortable fingertip operation.
- Tilt-in top and bottom sashes make cleaning safe and easy from inside the home.
- Triple-barrier weatherstripping provides superior protection from air and water infiltration.
- Full or half fiberglass screens provide ventilation while keeping insects out.
